

Amendments to the Abstract:

Please amend the Abstract of the Disclosure section starting at page 59, line 2 and ending at page 59, line 22 to read, as follows.

A developer supply container substantially non-rotatably mountable, with a developing device for developing an electrostatic image with a developer, device, to a rotatable member provided in an image forming apparatus, the [[said]] developer supply container being adapted to supply a developer into the developing device therefrom with rotation of the rotatable member, the [[said]] developer supply container includes a container body for containing the developer; a discharging opening, formed in a peripheral surface of the [[said]] container body, for permitting downward discharge of the developer; a feeding portion, provided on an inside surface of the ~~in said~~ container body, for feeding the developer in a feeding direction toward the [[said]] discharge opening with rotation of the [[said]] rotatable member; and a developer movement constraining portion, provided adjacent a position opposed to a position of the ~~facing said~~ discharge opening on the inside surface of the ~~within said~~ container body, independently of said feeding portion, for constraining the developer which is reversed into the [[said]] container body through the [[said]] discharge opening when the [[said]] discharge opening faces upward with rotation of the [[said]] rotatable member, from moving in a direction opposite to the feeding direction.
